

EMPLOYMENT OPPORTUNITY: TECHNICAL DIRECTOR

The Uni-Bell PVC Pipe Association is seeking a Technical Director to manage the Association's standards and certifications activities, produce its technical publications, publish articles, and to provide senior-level technical support and training on the design and installation of PVC pipe and fittings to water/wastewater utilities, consulting engineers and member company sales personnel/representatives.

Candidate must have a civil/mechanical engineering degree; knowledge of PVC piping standards, specifications, and municipal procurement protocols; a superior understanding of PVC pipe performance characteristics; superior oral and written communication skills; and proven ability to interface with senior public officials. Sales experience also desired.

Competitive salary with bonus structure and excellent benefits package, including car. Travel required. Position is based in Dallas.

Start Date: Immediately.

Please send resumes to Amanda Cassidy @ acassidy@uni-bell.org
