

North East Regional Engineer

The Unibell PVC Pipe Association, a thirty-eight year old non-profit trade association representing manufacturer's of polyvinyl chloride pipe (PVC pipe), is seeking a motivated, energetic, and personable individual to join its regional engineering team. Applicants should have an Engineering degree from an accredited university or college. Consideration will also be given for an individual who has multiple years of experience in the PVC pipe manufacturing industry. Work experience in water and wastewater design is a plus. Initiative and leadership qualities are a must.

Successful candidates will need to have excellent communications skills, both written and oral, and be able to travel throughout their service region. The geographic region currently available is the Northeast region of the United States (Delaware to Maine) and the Eastern region of Canada.

The work includes technical support to utilities, design engineers, and contractors. The successful candidate will be responsible for making educational presentations to engineering firms, municipalities, and other key material specification decision makers. The regional engineer will also assist municipal specifying groups in developing PVC pipe specifications and representing Unibell on selected working committees and consensus standards writing organizations.

Annual starting salary is commensurate with experience and ability. Benefits include paid medical insurance, disability insurance, 401-K retirement plan, auto allowance for company vehicle, auto insurance, and paid cell phone. The association also offers an extra bonus compensation plan to its regional engineer's who go above and beyond the expectations of the association.

Interested candidates may email their resumes to Unibell Executive Director Jim Stepahin at jstepahin@uni-bell.org. Applications may also be faxed to the Unibell office in Dallas, Texas to Mr. Stepahin's attention at (972) 243-3907. Applications will be taken through the close of business on Friday, July 3rd, 2009. Interviews will be conducted in July with a projected starting date of August 1, 2009.
