The popularity of PVC pipe for force mains is booming. More and more designers and specifiers are choosing PVC over other piping products because of the performance advantages offered by PVC in this demanding application.

The Third Special Edition of the Uni-Bell PVC Pipe News (the front and back cover are shown on this page) examines this topic in detail. The very real challenges that force mains present are described, and PVC’s ability to excel in this aggressive environment is discussed.

For further design guidance, the reader is referred to Uni-Bell’s latest technical report, UNI-TR-6, PVC Force Main Design. (See page 7 to order your complimentary copy of UNI-TR-6.)

Please let us know if you would like a copy and we would be pleased to send you one.
